Notice

A Note Regarding EHI Extractions: Please note that those who use Health IT Module(s) certified to the “EHI export” criterion remain responsible for safeguarding the security and privacy of individuals’ electronic health information (EHI) consistent with applicable laws and regulations related to health information privacy and security, including the Health Information Technology for Economic and Clinical Health (HITECH) Act, Health Insurance Portability and Accountability Act (HIPAA) Privacy and Security Rules, 42 CFR part 2, and state laws. The existence of a technical capability to make EHI more accessible and usable by Health IT Module users does not alter or change any of their data protection responsibilities under applicable laws and regulations.

Furthermore, use of the software programs described herein, and this documentation, is subject to applicable license agreements and non-disclosure agreements. The document is the property of Sightview Software, LLC (“SIGHTVIEW”). SIGHTVIEW reserves the right to update, change, improve, or modify the document without prior notice.

EHI Extraction Disclaimer, Indemnification, and Waiver. Pursuant to the Client’s extraction request, SIGHTVIEW will prepare and deliver Electronic Health Information Extract (“EHI Extract”). SIGHTVIEW shall make every effort to preserve the security and confidentiality of all PHI and PII of the Client’s files. SIGHTVIEW shall transmit the Client’s information over the internet. By utilizing the EHI Extract Tool, absent a compromise of our computer systems, if any confidentiality and / or security breach occurs because of data transmission over the internet pursuant to Client’s request, and / or otherwise occur as a result of Client’s handling either by their assigned new data vendor and / or by Client’s designated repository, principals, agents, employees, staff, and / or assigns, Client agrees that this will not constitute a breach of any obligation of security and confidentiality by SIGHTVIEW as delineated in the Business Associates Agreement (“BAA”) by and between Client and SIGHTVIEW.

Furthermore, Client will indemnify, defend, and hold SIGHTVIEW and its affiliates, directors, officers, employees, agents, licensors, successors and assigns harmless from and against any and all third-party claims and losses resulting from or attributable to Client’s EHI Extraction, including Client’s misuse or other use of the data outside the scope of granted under the original Agreement and or BAA, including but not limited to: (a) Client’s gross negligence or willful misconduct in performing any of its obligations under the original Agreement and / or BAA, or (b) a material breach by the Client of any of its representations, warranties, covenants or agreements under the original Agreement and / or BAA. Furthermore, an election to seek indemnification for a Claim arising from an alleged breach of the original Agreement and / or BAA will not preclude such SIGHTVIEW from any other rights or remedies it may have at law or in equity for such alleged breach.

Notwithstanding anything herein to the contrary, Client’s indemnification obligations hereunder shall not apply to claims resulting from SIGHTVIEW’s failure to comply with the terms of the BAA entered into between the parties.

Introduction

This document describes how to extract and read patient(s) information included in the exported Electronic Health Information (EHI) .zip file generated using the My Vision Express, LLC certified product.

The following conventions are used in this document.

| | |
|--------|--|
| <name> | The text between the < > brackets is a place holder for the actual contents. |
| .zip | A compressed file that uses less disk space and must be extracted to view the contents within. |
| .csv | Files with this extension use comma-separated values and are easily viewed in Excel or similar spreadsheet applications. |

EHR Specific Workflow Guides for EHI Export can be found via [ONC Certification | Sightview](#)

Guide to your Electronic Health Information

The EHI exported data provided depends on the data maintained and stored within the application. Data output and results are subject to the data that is stored at the time of the export and may vary according to search parameters selected by the internal user. A list of the possible data included in the exported file is described within this document. The data is provided in a compressed .zip file that must be extracted to view the contents. The name of the .zip file identifies if the contents are discrete data or unstructured data.

| <u>Extraction Type</u> | <u>.zip file name</u> |
|------------------------|-----------------------|
| Discrete data fields | ehi_structured_file |
| Documents and Images | ehi_unstructured_file |

Extract the .zip file data

Most current computer and phone operating systems (OS) can natively process compressed (.zip) files. If your OS does not have the extraction functionality, you can download an application such as WinZip to perform the operation.

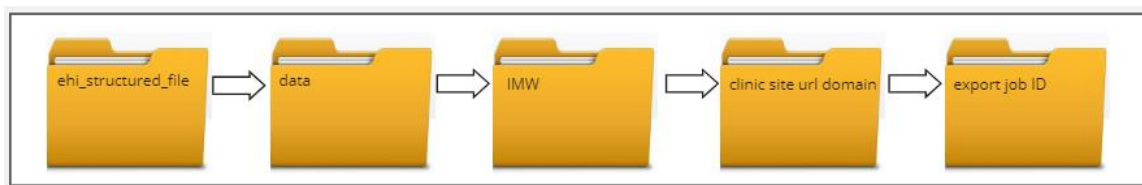

Windows

1. On your PC, go to the location containing the .zip file.
2. Right-click on the .zip file and then click Extract All.

File Structure and Format

The defaulted folder where you extracted the .zip file data contains multiple subfolders. The export job folder contains a categorization of subfolders that contain the data .csv files. Every export request will be assigned a unique Job ID in consecutive numerical order. The Job ID will be the folder name.

*every export request will be assigned a unique Job ID in consecutive numerical order. The Job ID will be the folder name.

Structured Data is grouped into folders named:

| Name | Type |
