## Notice

**A Note Regarding Cost Disclosures:** Cost disclosures are intended to provide information regarding fees related to the use and/or subscription to certified functionality within the certified electronic health information technology and related health IT modules. Please note that the fees described herein are intended to provide the notification of the existence of a fee where one exists and not a detailed fee schedule. Additional fees may exist for functions, services, subscriptions that do not involve or require certified functionality, services, and subscriptions. This information is subject to change without notice but is mandated to be updated, at minimum, quarterly each calendar year as per the ONC Conditions of Certification Maintenance requirements.

#### Capability and Description

ONC Certification Criteria for Health IT applicable to iMedicWare Version R8-V3: a1, a2, a3, a4, a5, a9, a12, a14, b1, b2, b3, b10, c1, d1, d2, d3, d4, d5, d6, d7, d8, d9, d11, d12, d13, e1, e3, g2, g3, g4, g5, g6, g7, g9

iMedicare Version R8-V3 EHR is an EHR solution that supports healthcare professionals in ophthalmology and optometry in outpatient ambulatory environments. It allows users to perform a wide range of functions such as to:

- document, review, and edit patient health information including but not limited to problem lists, medication lists, medication allergy lists, family health history, and all aspects of the patient's eye exam,
- perform CPOE (computerized provider order entry) for medications, laboratory orders and imaging procedures,
- electronically create prescriptions and prescription-related information for electronic transmission to pharmacies,
- capture CQMs (clinical quality measures) and to export these in standard file formats,
- be alerted to possible CDS (clinical decision support) interventions,
- create and send health care summaries to the patient portal,
- Direct Mail Solutions - This functionality allows users to send and receive Direct-based messages to/from other users of certified health IT systems. Direct messages may include clinical data, notes, and other information. Our Direct offerings support related MIPS and ONC requirements for sending and receiving transitions of care summary documents. We also support a range of other messaging options including fax and email as well as printing conventional letters. Our Direct capabilities include bundled Health Internet Service Provider (HISP) services for facilitating message exchange. However, see additional types of costs that may apply for these and other third-party HISPs.
- Provide API solutions.
- Provide EHI Export capability for a single patient or all patients.

#### Types of Costs or Fees and Additional Types of Costs or Fees

There is a base licensing and subscription fee for each provider.

Subscription fees may apply to eprescribing services.

Subscription fees may apply to eprescribing services.

Subscription fees may apply to portal related services.

Subscription fees may apply to patient education document services.

Subscription fees may apply to third-party registry services required for MIPS compliance.

There is a one-time onboarding fee and a monthly subscription fee per provider for FHIR Standardized API for Patient and Population Services (170.315(g)(10) if using Blue Button Pro.

A connection fee will be charged to establish a connection to each third-party HISP with whom iMedicWare currently has no relationship. The cost of establishing connections can be substantial and may exceed the annual licensing and subscription fee in some cases. All costs are passed on to the customer(s) who requests the connection.

*This Health IT Module is compliant with the ONC Certification Criteria for Health IT and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services*

Product Name	Version	Date Certified	Certification Number
